CompuTainer Launches Interactive e-Health CD

In partnership with LearnScapes, CompuTainer has been involved with bringing high quality digital education to governments, corporates and individuals for over 2 years. With their highly successful Interactive Kiosks and Local Area Network versions of the HIV, AIDS, TB and Malaria content they have successfully trained thousands of people on their e-Health topics.

CompuTainer is pleased to announce their Interactive CD for a complete selection of content relating to e-Health. Topics covered in the latest release are as follows.

High quality graphical interface

Full outcome based education

The licences granted to any government, corporate and/or an individual allows the CD to be used in the workplace and the home. With this licence agreement we feel it is ideal to use the Interactive CD for training in your HIV Workplace Programme, thereby expanding the training provided not only to employees in your organisation but also to their families and friends. The training is fully outcomes based to clarify the participants knowledge gained during training.

For more information on the Interactive CD training and for pricing for your organisation please feel free to contact me for a demonstration of the product and for discussions on how we can enhance your HIV Workplace Programme.
