

**Introducing the “FOR LIFE”
HIV Awareness Playing Cards**

CompuTainer and Synergy Health have jointly developed a unique concept in raising levels of HIV and AIDS awareness in the workplace, home and community centres. With casino quality playing cards, each with a custom messages discussing HIV and AIDS. These cards present a new way to raise levels of awareness on HIV and AIDS for all ages.

If you intend giving a pack of cards to each employee or if you intend giving a pack of cards away to suppliers and business associates, either way you are raising the awareness on HIV and AIDS in your industry.

The cards have been built around a central soccer theme. We have taken great care in getting full messaging around Abstinence, Being Faithful and Condomising. We have also taken extra care in adding Gender Issues, Myth Busting, Promoting VCT, Good Nutrition, Regular Exercise, Living Positively, Exposing Risky Behaviour and Positive Leadership.

The back of the playing cards may be customised for the client with corporate logos and/or messaging. For more information or a quotation, please call either Mark or Estelle.
